i-SAFE Parent Presentation

Presented By: Emad Elias and Gregory Miyata IMaST Lead Coaches

The Leader in e-Safety

Founded in 1998, i-SAFE Inc. is the leader in Internet safety education. Available in all 50 states, Washington, D.C., and Department of Defense schools located across the world, i-SAFE is a non-profit foundation whose mission is to educate and empower youth to make their Internet experiences safe and responsible. The goal is to educate students on how to avoid dangerous, inappropriate, or unlawful online behavior. i-SAFE accomplishes this through dynamic K-12 curriculum and community outreach programs to parents, law enforcement, and community leaders. It is the only Internet safety foundation to combine these elements.

In this day and age everyone knows students can explore the marvels of the world and travel to the most intelligent realms of our galaxy on the Internet. Concerned people now realize awareness and true safety online is not found in software filters - it is found in education and community support. Educated people realize true education and community support is found within i-SAFE.

The i-LEARN Online program and the i-Mentor Network will change the way you learn forever. i-SAFE knows you are busy and need a system of learning where you can stop, pause, and rewind at your convenience. i-LEARN Online and the i-Mentor Network are created as an "On Demand" system for you to learn safe and responsible use of the Internet at your own pace. i-SAFE provides the lessons you want, when you want them, all with the click of a mouse.

Tips for Families

✴ Keep the computer where everyone sees the screen.

✴ Don't post your personal information and beware of requests for your personal information online.

✴ Teach your child how to recognize and avoid predators.

✴ Report strangers who solicit meetings with any child to your local law enforcement.

✴ Report cyber bullying and threats to your local law enforcement, school, and/or ISP.

✴ Install and operate updated security software.

I-SAFE HAS A COMMUNITY OUTREACH PROGRAM

You know the best way for a student to take a concept and make it their own is with the support of their community. With that in mind the i-SAFE Youth Empowerment team was created to help Student Mentors take the message of Internet safety to their peers, their family, and their community. The i-PARENT program was designed to help parents team up and bridge the "Digital Divide" that separates them and their kids. And the i-SHIELD program brings together all divisions of law enforcement for one cause - cyber safety.
